

Definissee™ Threads

RELIFE
MENARINI group

**Definissee™
Threads**
procedures provide
immediate and long-
lasting facial contour
reshaping.^{1,2}

SIGNS OF AGEING

As we age our skin begins to suffer minor downward gravitational effects and the face starts to become more bottom heavy.^{1,3}

Definissee™ Threads

Definissee™ Threads are the result of 10 years research and studies aimed at achieving an effective solution for a non-surgical, minimally invasive face lifting.²

Definissee™ Threads is a range of absorbable, monofilament, suspension-barbed threads of synthetic origin (Poly-L-lactic acid and caprolactone, p(LA-CL)) to be used when tissue support is required.²

Definissee™ Threads has three types of lifting threads:

Definissee™ free floating threads

Definissee™ double needle threads

Definissee™ anchorage threads

CONSULT YOUR DOCTOR

Consult with your doctor to determine your suitability for the treatment. The procedure will only be performed by certified doctors specifically trained in **Definisse™ Threads**.

Definisse™ Threads is an innovative procedure with double action:¹

- 1 IMMEDIATE LIFTING EFFECT** for the reshaping of your facial contour¹
- 2 A DELAYED LIFTING EFFECT**, due to the fibrosis that appears along the length of the thread.¹

This is a minimally invasive procedure that does not require general anesthesia. The procedure has been proven to achieve very good patient satisfaction levels.³

RESULT

Clinical pictures of pre-and-post **Definisse™ Threads** procedure.
